Current Implementation of Best Practices for Pediatric Amplification

Kyler Vugteveen [A02392585] - Doc Student (w/Naveen Nagaraj)

November 03, 2022

Background

I will be analyzing survey data from the EHDI-PALS system to look for patterns in nationwide implementation of pediatric hearing aid best practices.

Sample

The survey data is accessible through the EHDI-PALS system.

Hypothesis

- 1) Understand the nationwide trends in pediatric best practices for hearing aid verification and validation.
- 2) Understand the average age at which children are getting hearing aids and any potential reasons for delayed intervention.

Progress

I have been working on the proposal for this study for my clinical research project.

Request

I need to talk with someone about specifically what analyses will be done to look at this data and finish my data analysis section of my proposal.

Timeline

I will begin data analysis next semester (Winter/Spring 2023).
