

Request #: 486 - PSY - Publication/Article
Cultural Differences in SCQ Reporting for Parents of children with ASD

Maryellen McClain [A02222754] - PSY Faculty

September 14, 2020

Background

Do parent reported behavioral concerns on the SCQ differ across racial/ethnic groups?

Sample

All data are collected. We have the following for the SCQ overall score broken down by race/ethnicity: 467 White, 527 Black, 41 Latinx, 24 Asian. We have the following for SCQ item analyses: 95 White, 97 Black, 5 Latinx, 8 Asian.

Hypothesis

That race/ethnicity may impact how parents report their child's behavior on the SCQ.

Progress

Data collection.

Request

Consultation on the analyses

Timeline

The team has not discussed, but likely aiming for a Spring semester submission deadline.
