## Marriage and Women in Bangladesh

Niyonta Chowdhury-Magaña [A02310970] - Doc Student (w/Melanie Domenech Rodríguez)

April 21, 2022

### **Background**

The study looks at marital characteristics, predictors, and outcomes for women in Bangladesh. I'm trying to do a meta-analysis, and have the n, means and SDS for some variables, and odds ratios and percentages for some others.

### **Sample**

Secondary data from Bangladesh - large sample sizes: 200 - 25,110.

### **Hypothesis**

Exploring the health, mental health, and quality of life outcomes for married Bangladeshi women.

Hypothesis: child marriage contributes to lower health, mental health, and quality of life outcomes for women.

### **Progress**

A systematic review with coded tables.

### **Request**

Help with performing the meta-analysis

### **Timeline**
