

Request #: 589 - PSY - Publication/Article  
LGBTQ+ Mormons' Changing Religiosity over Time

Tyler Lefevor [A00385825] - PSY Faculty

December 06, 2021

**Background**

This is a manuscript that is part of a grant competition.

**Sample**

I'm doing a 10-year longitudinal study of LGBTQ+ Mormons and will be collecting wave 2 data in early 2022.

**Hypothesis**

Right now, I have two main questions: a) How much do LGBTQ+ Mormons change their relationship with the LDS church over time? and b) How do changes in religiousness relate to changes in health for LGBTQ+ Mormons?

**Progress**

I have already collected and analyzed wave I data and have the wave II survey planned and under IRB approval

**Request**

I have not done longitudinal analyses before and would like help conceptualizing the analyses for this project. I would also love help thinking about power in this context

**Timeline**

I am submitting this project in a grant competition due on 1/1/22. The grant competition is asking that we have a completed intro, method, and proposed analysis section
