

# Request #: 517 - PSY - Abstract

## Cognitive Decline and Sleep Disturbance

Julie Murray [A02225515] - Doc Student (w/Scott DeBerard)

January 15, 2021

### **Background**

I am working with Joann and Hector on an extension of my MLM course project for an abstract for AAIC

### **Sample**

Data from CCMS/DPS

### **Hypothesis**

This project uses MLM to look at the relationship between cognitive decline and sleep disturbance across time.

### **Progress**

I completed much of the analysis for my PSY 7650 course project, but need to go back and control for depression and whether or not the caregiver reporter lives with the patient

### **Request**

I need some help with R (inputting the “new” variables into the R dataset) and also to consult about previous run analyses.

### **Timeline**

The abstract is due Jan 25, but we have enough done that we can submit the abstract prior to me meeting with you if need be and then finish the analyses if/when the abstract is submitted.
