## Correlates of ADHD Knowledge

Megan Golson [A02086849] - Doc Student (w/Maryellen)

November 16, 2021

### **Background**

My thesis showed preliminary trends that ADHD knowledge influenced parents stigma and use of treatment for their child with ADHD. I want to study this further in a diverse sample.

### **Sample**

I have not collected data yet. I need to figure out sample size and analyses.

### **Hypothesis**

Greater ADHD knowledge predicts greater willingness to access treatment and reduced ADHD stigma.

### **Progress**

I have reviewed ADHD knowledge measures (Paper 1 of dissertation) and selected the ADHD knowledge and stigma measures.

### **Request**

Analysis planning

### **Timeline**

I would like to propose Spring 2022.
