

Request #: 573 - PSY - Dissertation

Tests of executive function predict fall risk in older adults

Alexandra Hammond [A02277720] - Doc Student (w/JoAnn Tschanz)

September 27, 2021

Background

This project is based on data obtained from the Cache County Study Study on Memory and Aging/DPS and the Utah Population Database

Sample

Data has been obtained from the above datasets.

Hypothesis

N/a

Progress

I am currently working on data cleaning and exploratory summaries.

Request

I am having difficulty transitioning long format data to wide format data in order to run initial frequencies.

Timeline

ASAP, but no hard deadline.
