school and home: effects on minority stress

Sean Weeks [A02253957] - Doc Student (w/Tyler Renshaw)

July 14, 2021

## **Background**

I am looking at the mediational role of minority stress in the relationship between the predictor variables of accepting home and school climates and the outcome variable of life satisfaction.

## **Sample**

293 sexual minority adolescents

## **Hypothesis**

I expect that accepting home and school climates affect life satisfaction through minority stress.

## **Progress**

data is cleaned, descriptives and primary analyses are also complete.

## **Request**

I need help making sure I'm accurately interpreting my results and that I ran the analyses appropriately. Advice on what to include in my results and tables would also be helpful.

## **Timeline**

No rush. I'm hoping to defend sometime in the fall semester.
