

Request #: 428 - PSY - Publication/Article
Prevalence of ASD in Utah

Maryellen McClain [A02222754] - PSY Faculty

October 19, 2019

Background

We are interested in understanding what variables may be related to the increase in ASD identification in Utah.

Sample

We plan to collect data through coding existing medical/educational records.

Hypothesis

We think that the method of evaluation is highly related with the increase.

Progress

None - still in study conceptualization/planning phase.

Request

Consultation regrading options for analyses given our study design.

Timeline

N/A
