Request #: 509 - PSY - Dissertation

Risk Factors for Early and Late Onset Depression and Subsequent Risk for Alzheimer's Disease and Related Dementias in an Older Adult Population

Jordan Kugler [A02181270] - Doc Student (w/JoAnn Tschanz)

December 21, 2020

Background

We are utlizing the CCSMA data in conjunction with data from the Utah Population Database to answer questions related to lifetime depression and risk for AD and related dementias

Sample

5092 individuals in the CCSMA

Hypothesis

Seeking assistance with merging medication database

Progress

Merged CCSMA data with Derived Depression dataset.

Request

Dr. Tschanz is requesting that we also merge the "medication datasets" into my dissertation dataset. She indicated that this dataset will also take some orienting to. I request meeting with Dr. Schwartz, who is a member of my dissertation committee and is familiar with this project (we have met several times)

Timeline

I would like to be in a position to defend my dissertation by May '21
